Abstract

A process for producing a compound represented by the following formula (IV):

(wherein R denotes a hydrogen atom, an alkyl group, or an aryl group), comprising reducing a compound selected from the group consisting of:

a compound represented by the following formula (I):

(wherein R is as defined in the formula);

a compound represented by the following formula (II):

(wherein R is as defined in the formula); and a compound represented by the following formula (III):

(wherein R is as defined in the formula), by reacting the compound with a cell of a microorganism and/or a cell preparation thereof capable of stereo-selectively reducing a keto group.
